

RISING STEM VALVE SENSOR

SET AND FORGET PROXIMITY SWITCH TECHNOLOGY

Eliminates the need to adjust Micro-Switches or Proximity Switches.

Provides reliable valve position feedback for single-seat and double-seat valves.

One unit replaces two proximity or micro-switches.

Multiple outputs for indicating valve-open, valve-closed, seat lift and seal wear.

No mechanical adjustment required.

Easy setup with push button "teach" function.

Bright LED's indicate position of valve stem.

State-of-the-art sensing technology.

Sensor is compatible with industrial plc's , Asi and DeviceNet systems.
